TechHome customised remote controls

You may not be aware, but it is possible to customise your Techhome remote to better suit your requirements. When purchasing a techhome remote, consider having your company logo or designated button functions printed on them. In the past, TechHome's customers have found the option of customimising remotes a useful additional option. Customisation is also a valuable way to promote your company.*

TechHome customised remote controls: Example

This is an example of how you might customise a remote by adding a logo and button functions.

Remember **any** of our remotes can be customised, we have just used the TVTXQ9126A03 remote as an example (a customer has ordered this configuration)
