Quality & Affordable

TechHome's wireless home automation products combine quality and affordability. Easy to install in both new and existing homes, our wireless home automation products enable home owners to build a home automation system to suit any budget.

Flexible & Easy

Installing a TechHome automation system allows the home owner to control and monitor household devices via remote control or SMS. It's simple to set up grouped and timed functions to activate lights, security monitoring and climate control. Less time spent on mundane tasks gives you more quality time to enjoy.

Remote Controls

Door control unit

Remote controls

Outdoor Gates & Doors

Open front gates & garage doors, and turn on inside & outside lights from the safety & comfort of your car when you arrive home.

Shutter controller

Save Resources

TechHome's remote control solutions allow home owners to reduce household energy consumption. For example, by controlling shutters and air conditioning you can significantly cut energy usage. Less energy consumed means fewer greenhouse gases and lower electricity bills.

Lifestyle & Value

TechHome's quality remote controls provide value-for-money automation. Easily automate garage doors, gates, blinds, shutters and lighting to give your family more privacy and security, and enhance your property and lifestyle.
